

The Society for Design Administration presents

THE ALL-NEW EDTrak™

The all new **EDTrak** software is finally here!

The Society for Design Administration (SDA) recently teamed up with *Base Builders* to create our all-new **EDTrak** software. Base Builders has been developing project management software for architects and engineers since 2002 (you can check out their flagship product Praesto at www.basebuilders.com).

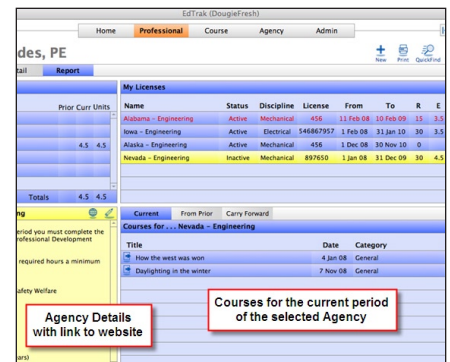

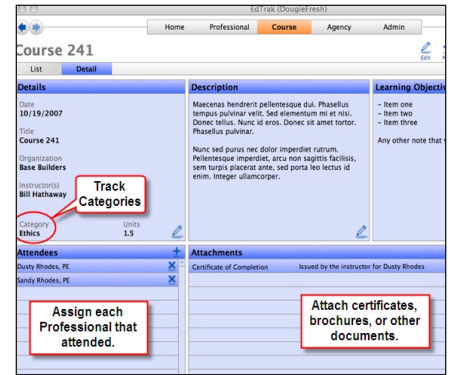

EDTrak is now everything we wanted it to be and more. It allows users to track all professionals, each with an unlimited number of licenses. Entering courses is very simple, and users can assign an unlimited number of attendees to each course. As an added bonus, certificates and/or attendee lists can be scanned and stored directly in the system! No more cumbersome filing.

So what can EDTrak do for you?

- Track all of your professionals and their licenses
- Notify you of upcoming license renewals
- Track courses and the attendees
- Track continuing education units for courses by professional and agency
- Generate continuing education reports for license renewals

This new software solution also allows SDA to send out periodic updates that will include up-to-date agency requirements for continuing education. This includes all 50 states, DC, NCARB, AIA, SDA, and others. The all new **EDTrak** will also keep a historical record of past courses and renewal periods. Never worry about an agency audit! **EDTrak** has the ability to carry credits forward (in the event that agencies allow for this).

The interface is very intuitive and straightforward. If you can surf the Internet or shop online, you'll be able to use the software without even opening the "Getting Started" guide. Stay tuned for an announcement of where you can download your FREE trial version!

TESTIMONIALS

"EDTrak is great because you can put anything you want in there in terms of education, and then 'link' it to all the professionals that you have in there as well. If you want to track your SDA continuing education for certification, or anything else, you can do that too."

– **Betsy Nickless, SDA/C, Associate/Business Manager**
Steven Langford Architects, Inc., Santa Ana, CA

"I have used EDTrak and it is great! It makes keeping track of your employees much easier than a spreadsheet. It allows you to keep track of education and licensures, and is user-friendly as well."

– **Bridget R. Egloso, Project Manager Assistant**
Clark Nexsen Architecture & Engineering, Norfolk, VA
